

#	Day	Module	Topic	Details	Day	Commne
1		Module 1: JavaScript Fundamentals	JavaScript Introduction	History of JS Role in testing Development setup		
2			Data Types & Variables	Primitives let/const/var Type coercion		
3			Operators & Expressions	Arithmetic Comparison Logical operators		
4			Control Flow	if/else switch ternary operator		
5			Loops	for while loop control		
6			Functions Basics	Function declaration parameters return values		
7			Arrow Functions	Arrow syntax this binding use cases		
8			Arrays	Array methods iteration spread operator		
9			Objects	Object literals properties destructuring		
10			DOM Manipulation	Selectors events DOM methods		
11			Async JavaScript	Callbacks promises async/await		
12			ES6+ Features	Modules classes template literals		
13		Module 2: Introduction to Playwright	Playwright Overview	What is Playwright features vs Selenium		
14			Installation & Setup	npm install project structure configuration		
15			First Test	Writing tests running tests results		
16			Selectors, Shadom DOM, SVG	CSS text role selectors		
17			Locators	getByRole getByText getByTestId		
18			Actions	Click fill select options		
19			Assertions	expect toBeVisible toHaveText		
20			Browser Contexts	Incognito multiple contexts isolation		
21			Screenshots & Videos	Screenshots videos debugging		
22			Playwright Inspector	Debug mode trace viewer codegen		
23		Module 3: TypeScript Fundamentals	TypeScript Introduction	Why TS setup compilation		
24			Type Annotations	Basic types inference any vs unknown		
25			Interfaces	Defining optional readonly		
26			Types vs Interfaces	Type aliases union types		
27			Functions in TS	Typed params return types overloads		
28			Generics	Generic functions constraints		
29			Enums & Literals	String enums numeric enums literals		
30			Classes in TS	Access modifiers abstract classes implements		
31			Modules & Namespaces	Import/export resolution namespaces		
32			TS with Playwright	Type-safe tests custom types best practices		
33		Module 4: Advanced Playwright Features	Network Interception	Route handlers mock responses		
34			API Mocking	Mock APIs fixtures responses		
35			File Handling	Uploads downloads assertions		
36			Dialogs & Alerts	Alerts confirms prompts		
37			Frames & iFrames	Frame locators nested frames		
38			Multiple Pages	Tabs popups events		
39			Authentication	Login flows storage state		
40			Geolocation & Permissions	Location permissions emulation		
41			Mobile Testing	Device emulation viewport testing		
42			Visual Testing	Visual regression pixel matching		

#	Day	Module	Topic	Details	Day	Commne
43		Module 5: Playwright Test Runner	Test Configuration	playwright.config projects reporters		
44			Test Organization	describe hooks tags		
45			Fixtures	Built-in custom worker fixtures		
46			Parallel Testing	Workers sharding parallelism		
47			Retries & Timeouts	Retries timeout config		
48			Reporters	HTML JSON custom		
49			Test Annotations	skip only fixme slow		
50			Parameterized Tests	Data-driven matrices		
51			Global Setup/Teardown	Global setup teardown		
52			Debugging Tests	Debug mode VS Code traces		
53		Module 6: API Testing with Playwright	API Testing Basics	HTTP methods status codes		
54			APIRequestContext	Headers auth		
55			GET Requests	Query params assertions		
56			POST Requests	Request body file upload		
57			PUT & PATCH	Update ops idempotency		
58			DELETE Requests	Delete ops soft deletes		
59			API Authentication	Bearer API keys OAuth		
60			Response Validation	Schema error handling		
61			API + UI Testing	Hybrid tests		
62			API Performance	Response time monitoring		
63		Module 7: OOPS in TypeScript + POM	OOP Concepts	Encapsulation inheritance polymorphism		
64			Classes Deep Dive	Constructors methods		
65			Inheritance	extends super override		
66			Abstract Classes	Abstract methods base classes		
67			Interfaces in OOP	Contracts composition		
68			Design Patterns	Singleton factory builder		
69			POM Introduction	What benefits structure		
70			Creating Page Objects	Locators actions		
71			Page Components	Reusable components		
72			Base Page Pattern	Base class common methods		
73			Fixtures with POM	DI test setup		
74			POM Best Practices	Naming maintenance		
75		Module 8: Advance Playwright Framework	Framework Architecture	Structure layers		
76			Data Management	JSON CSV env vars		
77			Utility Functions	Helpers wrappers		
78			Logging	Console file levels		
79			Error Handling	Try/catch recovery		
80			Reporting	Allure screenshots		
81			Git Basics	Branches commits		
82		Module 8.1: Git, Github Actions, CI/CD	Git Workflows	PRs reviews		
83			GitHub Actions	Workflows jobs		
84			CI Pipeline Setup	Triggers artifacts		

#	Day	Module	Topic	Details	Day	Commne
85		Module 8.2: Docker	Docker Basics	Images containers		
86			Playwright in Docker	Headless CI		
87			Parallel CI Execution	Matrix Dharding		
88			Advance Playwright Complete Framework	Integration docs		
89		Module 9: Career Development	Resume Building	SDET resume projects		
90			Interview Preparation	Questions live coding		
91		Module 10: Playwright + AI				
92			Playwright MCP	Playwright MCP		
93			Playwright MCP	Playwright MCP
